

MIMLED 1000

Compact LED Surgery lamp.

HIGH EFFICIENCY

MIMLED 1000 100.000 lux at 1 meter

HOMOGENEOUS ILLUMINATION

Each LED module illuminates the surgical field independently. The result is a shadow-free and homogenous light field over a large depth of illumination even when operating directly under the luminaire.

LIGHT CONTROL WITH ENDO MODE

While most compact medical luminaires cannot be operated at reduced brightness, the MIMLED offers a wide range of brightness options down to only 10.000 lux.

COLOR RENDITION / TEMPERATURE

The lights provide a high color rendering index (CRI) of over 95 for optimal tissue contrast. Especially red color tones are reproduced with highest fidelity ($R_v > 90$) and enhance the visualization of the surgical field. The MIMLED have a fixed color temperature of 4.000 K.

DESIGN & HANDLING

The compact and rounded shape of the luminaire reduces drag in OR with laminar flow systems and keeps the operating field sterile. Separate light controls for sterile and non-sterile users ensures intuitive and safe handling. Turn on the light and control the brightness by simply turning the blue sterile handle.
